

Clayards, M., Niebuhr, O., & Gaskell, M. G. (2015). The time course of auditory and language-specific mechanisms in compensation for sibilant assimilation. *Attention, Perception, & Psychophysics*, 77(1), 311-328.

Due to an error during the production stage, the data presented in Figure 5 on page 321 is identical to that presented in Figure 3 on page 320. The data in Figure 3 are correctly printed. The data in Figure 5 are not correctly printed. The data corresponding to Figure 5 is attached

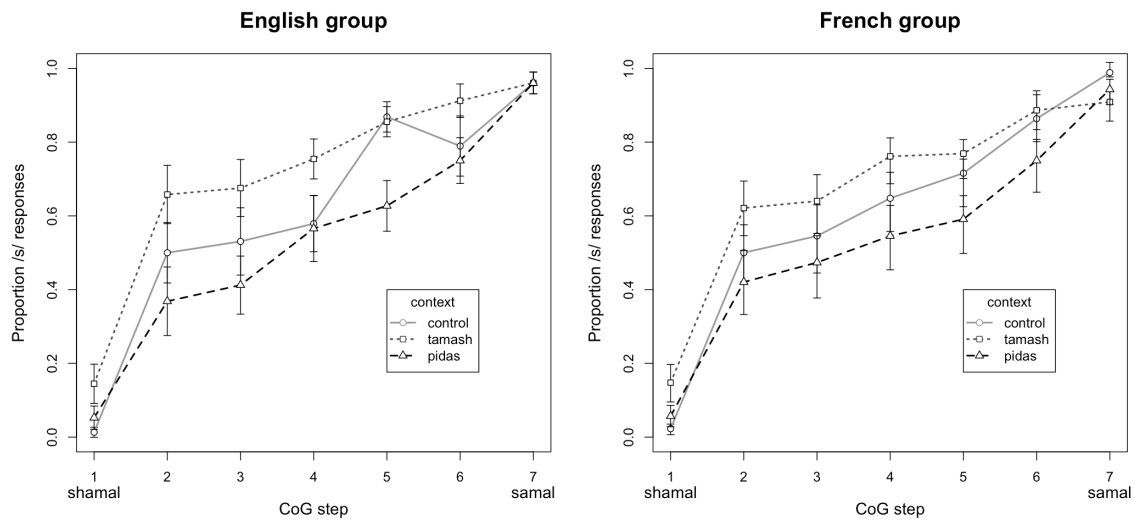

Figure 5: Mouse click responses for the two groups of listeners categorizing the *shamal - samal* continuum after one of three different contexts: control (solid lines, circles), *pidas* (dashed lines, squares) and ‘tamash’ (dotted lines, triangles). Error bars are standard errors
